## BioOGF- Oil, Grease and Fat Degradar

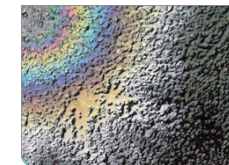

BioOGF is designed to digest fats, oils, greases and other organic waste, typically associated with grease traps and waste water systems. This product is used in restaurants, fast food chains and all other food preparation areas.

## BioSeptic- Septic Tank Treatment

BioSeptic is a specialised biological treatment for degrading organic matter in waste water systems including septic tanks. The product accelerates the breakdown of organic matter, reduces sludge build-up and eliminates odour.

## BioSlick- Oil Discharge Cleaner

BioSlick is an oil and drive cleaner that uses biodegradable microbes to remove grease, oil, dirt, petrol, diesel and other hydrocarbon spills from hard surfaces such as drives, garage and workshop floors. The product is an excellent choice for heavy duty spills and all round cleaning.

## BioSpa- Pool, Jacuzzi & Hot Tub Treatment

BioSpa is the ONLY environmentally friendly way to improve the quality of pool, Jacuzzi, Hot Tub and spa waters. The product rapidly biodegrades the organic contaminants present in pools, spas, Jacuzzi's and hot tubs etc

*BioSmart Biological Cleaning Solutions are exclusive products supplied by Emellord Associates Limited. These cleaning solutions are a unique blend of enzymes that harnesses nature's powers to provide environmentally safe cleaning products. This makes the BioSmart range of products conducive for speeding up degradation of organic waste in a wide variety of application including kitchens, bathrooms, drains, grease pits etc. The products also create a biofilm on the surfaces it is applied to, thus providing a long lasting effect compared to conventional chemical cleaning products.*

## BIOSMART RANGE OF PRODUCTS

The BioSmart range of products have been duly checked and registered by the Foods and Drugs Authority (FDA). The products come in both liquid and powder forms. Listed below is the product range under BioSmart Biological Solutions and their purposes:

### BioBin- Kitchen/Outdoor Waste Deodorizer

BioBin contains a unique blend of odour eliminating ingredients. The product also breaks down protein based deposits in bins and is entirely friendly to the environment.

### BioBreeze- Outdoor Toilet Treatment

BioBreeze is a specialized biological treatment for degrading organic matter in outdoor toilets. The product contains free enzymes to kick-start the digestion of waste material, and naturally occurring microbes to continue the enzymatic breakdown. This process helps to reduce malodours in and around the toilet area. The product also contains a pleasant fragrance to deter pests and to leave the toilet smelling pleasant.

### BioCidal- Multi Surface Sanitizer

BioCidal is a naturally derived cleaning product, which combines 'eco-friendly' plant derived surfactants with natural fermentation products to produce an effective "biocide". This complex natural blend within the product effectively eradicates and kills all germs/bugs (bad bacteria) that are present on the kitchen work surface, ensuring a trouble free environment.

### BioClean- Multi Surface Cleaner

BioClean is a specialized concentrated biological blend for multi surface cleaning. It effectively combines biodegradable surface surfactants, beneficial bacterial strains and fresh fragrance, which digest organic debris at the source. This product can be used to clean washrooms, public sanitation areas and for floors

### BioClear- Hair Degrader

BioClear is a hair degrader for preventing and clearing sinks and drains. It uses a blend of environmentally friendly enzymes and bacteria and is suitable for use in the home, hair salons and pet parlours.

### BioCube- Urinal Block and Cage

A highly effective biological urinal treatment system which helps control the odours from urinals, helps slow the buildup of uric scale, and provides a fresh, clean fragrance for the urinal. Regular use of the system can also save money in water flushing costs and reduce urinal flushing to virtually zero.

### BioDrain- Drain Maintenance

BioDrain is a blend of naturally occurring microbes that digest fats, oil, grease and other organic waste to keep grease traps, drains and waste water systems clear and should be used for maintaining trouble free drains.

### BioFil- Landfil Waste Treatment

The BioSmart BioFil Waste Treatment Concentrate is the biological answer to offensive odour. This product considerably accelerates the breakdown of waste material and greatly reduces offensive odour.

### BioFlush- Drain Unblocker

BioFlush is a drain un-blocker which is carefully designed for breaking down organic debris such as plant based material, protein and starch-based waste, fats, oils and greases.

### BioGrease- Cooker Hood Grease Degradar

BioGrease removes grease, oil, fats and dirt from cooker hoods. The product has been formulated to quickly cut through the toughest of organic matter on cooker hoods.

### BioMould- Mould Treatment

BioMould removes dirt and stains associated with mould and attacks the mould spores that are evident on the property walls. The product effectively combines natural plant extracts and a fresh fragrance so it is safe for the environment, non-inflammable, non-toxic and readily biodegradable.
